

Improving Digital Acumen of the CIA Workforce

Project Title	Improving Digital Acumen of the CIA Workforce
Project Summary	This project will help improve the workforce's digital acumen and office productivity.
Country	United States

Project Description

Have you ever thought the Federal Government could be even more efficient? Well, now is your chance! Supporting this project will allow you to help public servants be more productive. It is part of the Digital Acumen Learning Program, focusing on fostering the workforce's understanding of how the digital domain can impact their professional and personal domains. Interns will research best practices of public and private digital acumen programs and produce (or find existing) blogs/articles on technology trends, digital learning success stories, and the overall digital environment, such as the 'internet of things,' social media, and cloud computing.

Required Skills or Interests

Skill(s)

Research

Social media management

Storytelling/blogging/vlogging

Writing

Additional Information

Interns will also create new (or find existing) training materials, such as short "how to" videos on digital tools. They can also research best learning options, such as games for learning computer programming.

Language Requirements

None
